

Peter Mueller

EcoVapor Recovery Systems

Peter Mueller is a petroleum engineer with extensive experience in operations, management, regulatory matters, and entrepreneurial ventures.

He graduated from the Colorado School of Mines in 1978 and worked in drilling, completions, production, marketing, and mid-stream facilities domestically and internationally, both for major oil companies and independents. He also served as Chairman of the Colorado Oil and Gas Conservation Commission during the 2000's.

In 2009, Peter and his son Hans, also a CSM graduate, founded EcoVapor Recovery Systems with a mission to reduce waste of natural gas and flaring in Colorado. EcoVapor continues to grow in multiple states across the US.

Peter enjoys both alpine and Nordic skiing, mountain and road biking, sailing, and traveling internationally. His charitable work is focused on Colorado's Children's Hospital and the Denver Rescue Mission.
